

Li Xinyang

Job Target: Product / Operations

Female | 25 | 15317270326 | 320589552@qq.com

Professional Strengths

- AI-Driven Product Operations: Proficient with Codex, DeepSeek, Kimi, Gemini, ChatGPT, Nano Banana, Yuanbao, Keling and leading LLM APIs; skilled in prompt design and AI workflow building, turning ideas into usable products quickly with vibe coding.
- Product Thinking & User Insight: Familiar with end-to-end product delivery (requirements-design-development-launch-iteration); strong in requirements breakdown, user research, competitive analysis and data-driven feature decisions.
- Data-Driven & Results-Oriented: Built data monitoring and review mechanisms to guide operations and product decisions - drove 30% quantified business growth and ~20% live-commerce GMV/margin growth.
- Tooling & Scalable Efficiency: Turn individual capability into reusable AI knowledge bases and content hubs that automate content production, letting one person deliver a full marketing team's output.

Internship Experience

- Ctrip** Commercial Product Operations Intern 2026.08-Present
1. AI Product Development & Operations: Applied vibe coding (Codex, DeepSeek) to build the AI Marketing Content Hub from 0 to 1 - requirements, design, development and launch; AI-generated copy and posters cut single-campaign asset production to under 3 minutes and drove 30% quantified business growth.
 2. Competitive Research & Product Optimization: Benchmarked competitor features, produced gap analyses and transferable feature lists, and improved usability with product teams, lifting exposure, retention and repurchase rates.
 3. Product Experience Research & Feature Decisions: Ran post-launch user research and experience tracking, evaluated feature value from feedback and behavioral data, and recommended optimization or retirement - a research-analysis-decision-verification loop.
 4. Sales & User Data Support: Built weekly sales reporting, analyzed outbound, conversion and deal data and their drivers; structured B-end feedback into closed loops that informed product iteration.
 5. Social Media Matrix & AI Efficiency: Coordinated content across WeChat Official Account, Douyin and Xiaohongshu, adapted high-value competitor topics, and combined AI tools (Kimi, Gemini, ChatGPT, Nano Banana, Yuanbao, Keling) to scale output and exposure.
 6. Supplier Sourcing & Management: Independently sourced and recruited suppliers via multiple channels, built a supplier pool with evaluation mechanisms, monitored delivery efficiency and quality, and verified QC reports for stable, quality-controlled supply.
 7. Supplier Training & Enablement: Delivered supplier training on platform policies and operating guidelines, organized sessions and Q&A, and followed up on effectiveness to improve policy awareness and fulfillment quality.
 8. Cross-Functional Collaboration: Aligned requirements and operating rhythm with product, operations, finance and legal teams to keep daily operations smooth.

- CHAGEE** HR Operations Intern 2025.07-2026.01
1. Community Operations: Identified the pain point of repetitive new-employee questions and low response efficiency (no unified inquiry channel), built the 'Chaji Rookie Village' community from 0 to 1, and unified inquiry and response across Finance, Legal, Admin and other teams - cutting repeated questions and raising efficiency and satisfaction; end-to-end problem solving.

- 2. Cross-Functional Alignment & Negotiation: Coordinated with LD, OC, CB, Finance, Legal, Admin and HRBPs to launch community content and activities, aligning goals, resources and schedules through multiple rounds of communication.
- 3. Data Analysis & Process Optimization: Designed onboarding surveys, tracked feedback three months after hire, ran multi-dimensional analysis and root-cause diagnosis, and delivered process improvements that enhanced the onboarding experience.
- 4. Knowledge Base & SOP Building: Contributed to the HR service desk and employee knowledge base, led module launches, wrote SOPs and knowledge frameworks, designed posters to raise platform usage, and ran biweekly content operations.
- 5. Content Operations & Data Review: Ran the 'Chaji Rookie Village' newsletter (1-2 posts per week), tracked engagement KPIs, and grew community activity from 0 to 40%, building a reusable employee community playbook.

Xiaohongshu

Influencer Operations Intern

2024.01-2024.08

- 1. Influencer Sourcing & System Building: Built tiered KOC/KOL criteria and an influencer database for e-commerce selling, onboarded 500+ influencers, and ran 5 travel & hospitality communities (1,000+ members) from recruitment to retention.
- 2. Live-Stream Commerce & Growth: Ran live-stream selling with influencers - planning, strategy, pre-live communication, scripts, pacing and post-live review - driving ~20% growth in GMV and gross margin.
- 3. End-to-End Partnership Management: Handled influencer communication, negotiation and relationship maintenance, building long-term selling partnerships and higher content quality.
- 4. Recruitment Campaigns: Ran 1-2 monthly recruitment cycles with independently designed copy, posters and surveys (~1,000 responses each), selecting 10 qualified influencers via multi-dimensional criteria; built reusable SOPs and screening models.
- 5. Head Account Content Operations: Operated the 100K-follower 'Zouzoushu' account - topics, copywriting, headlines and layout - with post-publish review and data-driven strategy iteration.
- 6. Visual Design: Produced recruitment posters and marketing assets in Photoshop, increasing recruitment note traffic and conversion.

Project Experience

AI Marketing Content Hub (AI Knowledge Base Workbench)

Independent Developer & Product Operations Lead

2026.08-Present

- 1. Product Planning & Problem Insight: Identified manual, slow and inconsistent marketing production; completed product positioning, requirements breakdown and feature planning, structuring business knowledge into a knowledge base that instantly generates unlimited taglines and copy.
- 2. AI Implementation: Applied vibe coding (Codex, DeepSeek) across requirements, design, development and launch, rapidly building an MVP to validate the core workflow; integrated leading LLM APIs, prompts and automated workflows into an end-to-end content pipeline.
- 3. Product Operations & Iteration: Owned the full product lifecycle - user feedback, usage data and feature iteration; built a content quality system so posters and assets look natural with no obvious AI traces.
- 4. Business Results: Drove ~30% growth in conversion rate and GMV after launch, proving the scalable value of AI-enabled product operations.

Education

Chongqing Jiaotong University

M.A. in International Chinese Language Education

2024.09-2027.06

Shanghai Sanda University

B.A. in Accounting

2022.09-2024.06

Honors & Certificates

- First-Class Scholarship
- CET-6 (College English Test Band 6)
